

## **Pratt & Whitney and Beacon Wireless sign License Agreement**

July 1, 2006 --- Toronto, Canada, Beacon Wireless Solutions, leaders in wireless monitoring and fleet tracking, today announced that it has completed a technology licensing and partnership arrangement with Pratt & Whitney US to provide access to Beacon's wireless communication platform.

"Pratt & Whitney's adoption our technology base further validates the work we have been doing to create the most reliable wireless communications platform in the industry." said David Lash, President of Beacon Wireless Solutions, "We are very pleased to be working with Pratt and see this as yet another signal that the telematics industry as a whole continues to expand rapidly as more and more companies find different ways of utilizing the technology."

### **About Beacon Wireless Solutions Inc.**

Beacon Wireless Solutions Inc. develops and manufactures a wide range of telemetry products for remote monitoring, security and vehicle tracking in the marine and automotive sectors. Beacon provides turnkey solutions backed by a proprietary Wireless-to-Web Notification and Response System. Core business activities include the FleetMaster products which provide fleet tracking for the automotive industry; the HarborMaster family of products designed for commercial and recreational boating markets to monitor crucial systems and engine diagnostics; and government approved SSAS systems for the commercial marine industry. Beacon Wireless Solutions holds patents in the telematics and marine fields. Located in Toronto, Beacon Wireless Solutions Inc. operates in the US, Canada, U.K. and Europe.

### **About Pratt & Whitney.**

Pratt & Whitney is a world leader in the design, manufacture and service of aircraft engines, space propulsion systems and industrial gas turbines. United Technologies provides high-technology products and services to the aerospace and building industries.
