Beacon Wireless Launches Total Fleet Management Package

(Toronto, Canada) Jan 12, 2005 -- Beacon Wireless Solutions Inc. announced today the commercial launch of the FleetMaster X-1 to provide affordable real-time vehicle tracking and monitoring to fleets of all sizes.

Based on the proven technology of Beacon's HarborMaster remote monitoring products for the marine industry, the FleetMaster takes advantage of the company's expertise in the wireless communications field with its expansion into the automotive marketplace.

The FleetMaster allows users to remotely track and control their fleets by providing real-time positioning, speed, run-time patterns, mileage and engine data for each vehicle in their fleet. Safety and security concerns are also addressed with various alarm capabilities including a panic button, intrusion alarms and stolen vehicle recovery.

"The Fleetmaster puts your fleet at your fingertips...literally," says David Lash, president of Beacon Wireless Solutions, "you can pinpoint any vehicle within your fleet and know exactly where it is, where it should be, and what it's doing. This information is critical to any company that has trucks or cars on the road."

The FleetMaster's flexible design is built to adapt to the rapidly changing wireless world by using a single platform able to accommodate multiple technologies today and in the future. Capable of using GSM/GPRS, CDMA/1X or satellite networks to transmit data, the FleetMaster is already prepared to utilize next generation networks as they become operational.

Designed for easy installation on trucks, buses, cars and vans, the Fleetmaster can be used on any size fleet. Beacon's focus on efficiency and ease of use continues with their Wireless-to-Web protocol which is a powerful tool that allows instant access to all fleet data via the internet without the need to install additional software.

"Making better use of time spent on the road makes your customers happier and saves you money. It's as simple as that. By providing a low cost, easy to use fleet management system the FleetMaster has leveled the playing field for fleet services of all sizes" said Lash, "It's time to make technology work for you."

Beacon Wireless Solutions Inc. develops and manufactures a wide range of telemetry products for remote monitoring, security and vehicle tracking in the marine and automotive sectors. Beacon provides turnkey solutions backed by a proprietary Wireless-to-Web Notification and Response System. Core business activities include the HarborMaster family of products designed for commercial and recreational boating markets to monitor crucial systems and engine diagnostics; FleetMaster products which provides automotive fleet tracking for the trucking industry; and government approved VMS systems for the commercial fishing industry.

Beacon Wireless Solutions holds three US patents in the telematics and marine fields.

Located in Toronto, Beacon Wireless Solutions Inc. operates in the US, Canada and Europe.
